

3. Existing supplies of vrc's may still be used. We suggest you continue to use your existing inventories until they are depleted, with the following being our recommended distribution priority order: 1) use your current supply of cards until your new county-specific forms arrive except in those cases where "Green Party" cards are specifically requested; 2) use old cards on a continuing basis, except when "Green Party" cards are specifically requested, for those outreach drives where you are asked to provide large volumes of cards for mass mailings and similar programs **and** which, based on your judgement and historical experience, have proven less effective than other types of outreach drives. You **should tell** the requestors that the cards which you are providing **do not** have the Green Party printed on them but that they are certainly still valid and the "Other" section in Box #7 can be used for registering as a Green or any other party member.

4. Even if the Green Party fails to notify us about their choice for participating in the presidential primary, it is quite probable that you will need to provide a write-in space on their June ballot for presidential candidates/delegates. A definitive answer to this question will be provided once the party decides whether it will or won't participate in a presidential primary and following further legal research.

I'm certain there are more questions from your experienced points of view. If you wish to raise them, please bring them to my immediate attention by calling (916) 445-0411 or faxing (916) 327-5534. Thanks and good luck!
